

Northwind Enterprises

Q1 2026 Sales Performance Report

Prepared by: Revenue Operations Team | Published: April 10, 2026

Executive Summary

Northwind Enterprises closed Q1 2026 with total revenue of \$18.4 million, representing 22% year-over-year growth compared to Q1 2025's \$15.1 million. New customer acquisition contributed \$6.2 million, while existing account expansion contributed \$12.2 million. The Enterprise segment outperformed targets by 14%, while the SMB segment fell short of target by 6%.

Regional Breakdown

North America remained the largest revenue contributor at \$9.8 million (53% of total), followed by EMEA at \$5.1 million (28%), and APAC at \$3.5 million (19%). APAC posted the highest growth rate at 41% year-over-year, driven primarily by new logo wins in Singapore and Japan.

Top Performing Products

The Northwind Cloud Suite was the top revenue driver, contributing \$7.9 million, followed by Northwind Analytics at \$4.6 million and Northwind Connect (integration platform) at \$3.2 million. The newly launched Northwind AI Copilot add-on generated \$1.1 million in its first full quarter of availability, exceeding the initial forecast of \$700,000 by 57%.

Customer Retention and Churn

Net revenue retention (NRR) for Q1 2026 was 118%, up from 112% in Q4 2025. Gross logo churn was 4.2%, slightly improved from 4.8% in the prior quarter. The primary driver of churn was pricing sensitivity among SMB customers on legacy contract terms, accounting for 61% of all churned accounts.

Sales Pipeline and Forecast

The sales pipeline entering Q2 2026 stands at \$52 million in qualified opportunities, a 3.2x coverage ratio against the Q2 target of \$16.3 million. The Enterprise segment pipeline grew 34% quarter-over-quarter following the expansion of the outbound sales development team from 12 to 19 reps in February 2026.

Key Risks

Management has identified two key risks for Q2: (1) continued softness in the SMB segment tied to macroeconomic pressure on small-business IT budgets, and (2) a competitive product launch from a key competitor expected in May 2026 that may pressure win rates in the mid-market segment.

Revenue by Region (\$M)

Region	Q1 2026	Q1 2025	YoY Growth
North America	\$9.8M	\$8.3M	+18%
EMEA	\$5.1M	\$4.4M	+16%
APAC	\$3.5M	\$2.5M	+41%
Total	\$18.4M	\$15.1M	+22%
